BONTU DEREJE LEGESE

FULL-STACK SOFTWARE DEVELOPER

Addis Ababa, Ethiopia | +251 965 714 504 | bontuderejelegese@gmail.com

PROFESSIONAL SUMMARY

Full-stack software developer and Computer Science graduate from Addis Ababa University (June 2025), experienced in building web applications and business systems with React, TypeScript, Laravel, Django, and relational databases. Project experience spans public-sector operations, digital lending, service discovery, and corporate websites. Comfortable working across frontend interfaces, backend application logic, database integration, and version control, with a strong interest in AI-enabled products and practical digital solutions.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Inertia.js

Backend: Laravel, PHP, Django, Python, Spring Boot, Java, REST API integration

Databases: MySQL, PostgreSQL, Supabase, SQLite, MongoDB, data modelling

Tools & Practices: Git, GitHub, Docker, responsive design, role-based access control, debugging

Additional: Problem-solving, teamwork, communication, documentation, content creation, tutoring

PROFESSIONAL EXPERIENCE

Software Developer | Ethio Innovation Software Development Company

Current • Addis Ababa, Ethiopia

- Contribute to software development work involving web application interfaces, backend integration, and maintainable application components.
- Apply modern development technologies and collaborate on implementing product requirements and improving user experience.

Software Developer | Faris Technologies

Previous role — dates to confirm • Ethiopia

- Gained professional software development experience working with web technologies and application features.
- Worked on frontend implementation, debugging, and collaboration within a software development workflow.

Software Engineer / React Developer | Internship / placement — organization to confirm

Sep 2025 – Oct 2025 (as supplied; verify employer and title) • Bole, Addis Ababa, Ethiopia

- Developed responsive user interfaces using React and TypeScript.
- Collaborated with designers and backend developers to implement product features.
- Worked on cross-browser compatibility, debugging, and maintainable frontend code.

SELECTED PROJECTS

Urban Beautification and Green Development System (UBGDS)

Technologies: Laravel, React, TypeScript, Inertia.js, MySQL

- Contributed to a web-based system supporting urban greenery, beautification operations, administrative structures, and operational reporting.
- Worked with modules covering users, roles and permissions, green assets, work orders, and maintenance-related workflows.

AI-Powered Digital Lending Platform

Technologies: React, TypeScript, Django, Supabase, Spring Boot

- Worked on a digital lending platform concept focused on streamlining loan workflows and presenting borrower information to applicants and administrators.
- Contributed to frontend experiences and integration across application services; describe AI scoring as implemented only where confirmed.

AI-Powered Service Intelligence Platform (ASIP)

Technologies: Next.js, TypeScript, Django, PostgreSQL, Docker

- Developed a platform concept for centralized service discovery, provider profiles, customer feedback, and AI-assisted comparisons and recommendations.
- Worked with provider onboarding, verification/moderation workflows, and a containerized development setup.

OBM Construction Enterprise Website

Technologies: Laravel, React, TypeScript, Inertia.js

- Developed a corporate website experience intended to present construction services, company information, projects, and business inquiry options.
- Focused on responsive interfaces, reusable components, and frontend/backend integration.

Ethio Innovation Software Development Company Website

Technologies: Laravel, React, TypeScript, Inertia.js, MySQL

- Worked on a corporate web presence to communicate company information, software services, and business capabilities.

- Used a Laravel and Inertia.js application structure with React and TypeScript interfaces.

TVEE — Tutoring & Educational Engagement Platform

Technologies: React, Django REST Framework

- Built a full-stack educational platform concept connecting students with volunteer instructors.
- Worked on dashboards, Q&A, scheduling, role-based access, authentication, and responsive interfaces.

SkillTrust Ethiopia — Skills & Competency Marketplace

Technologies: Next.js, Laravel, PHP

- Worked on a platform connecting learners, trainers, and employers around skills development and credentialing.
- Contributed to profiles, skill assessments, course management, endorsements, dashboards, and authentication.

EDUCATION

B.Sc. in Computer Science — Addis Ababa University | Graduated June 2025

Grade 12 / Secondary Education — ODA Special Boarding School, Adama | Year to confirm

LEADERSHIP & COMMUNITY INVOLVEMENT

- Leadership and Vision Development Club / Peace Club — Addis Ababa University
- Summer volunteering — Ministry of Education and Ministry of Peace
- Tutoring elementary and high school students

CERTIFICATES & RECOGNITION

- Grade 12 High Achiever Certificate / Gold Medal — ODA Special Boarding School, Adama
- Leadership Certificate — FOCUS Finfinne Student Fellowship / Focus Ministry (Mar 2023–Mar 2025; verify exact dates)
- Volunteering — Addis Ababa University, Ministry of Education, and Ministry of Peace

ADDITIONAL INTERESTS

Exploring emerging technologies and AI, improving software development skills, volunteering technical knowledge for community projects, and reading technology, fiction, and psychology books.
